

Milk and plant-based beverages are now part of the deposit system!

The recycling regulation has some exemptions including infant formula, meal replacements, concentrates, and products like whipping cream and drinkable yogurt. Containers exempt from the regulation won't carry a deposit. "Ready-to-drink" milk and plant-based beverages with a best before date prior to February 1, 2022, are exempt from the deposit system. No deposit was paid and therefore no deposit will be refunded.

Starting February 1st, a 10[¢] deposit will be charged on "ready-to-drink" milk and plant-based beverages like oat, soy, and almond and the 10[¢] deposit will be refunded when you return the empty containers for recycling.

Simply rinse out the containers, put the caps on or push the straws in, then take them to your nearest Return-It site.
